

6 Popular Denominator Traffic Tally Boards . . .

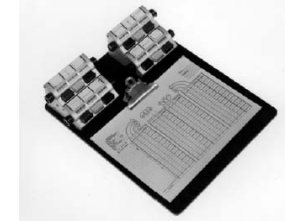

TWO WAY COMPACT

Two four-unit counters on a 14" square masonite board with spring clip or two three-unit counters on a 12" x 14" masonite board with spring clip .

BUDGET SPECIAL

Many uses- 16" square – complete with spring clip – use single row of four counting units in center to classify type of vehicles, while facing rows of three counters are used for lane use or directional flow – or, use all 10 counters together for classification counts (as shown), with 10 counting units.

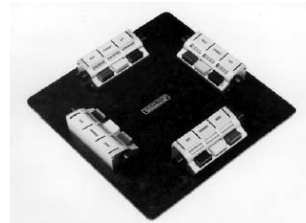

FOUR WAY COMPACT

Four trios tiered as shown. Twelve counting units on a 12" by 15" lacquered masonite board with spring clip or with 16 counting units on a 14" by 15" masonite board with spring clip.

SQUARE T

For a four-way intersection....18" square board with single counters for pedestrians, banks of three counting units each way for trucks and cars (as shown), 28 counting units in all.

THE OLD STANDBY

16 counting units on 12" x 12" board or with 12 counting units (as shown) three per bank.

KING SIZE

14" x 17" board complete with Acco fasteners for tally sheets – used for directional and volume counts of vehicles and pedestrians. Five counting units in each bank, 20 counting units in all (as shown).
